

# PRIVACY, SECURITY & RISK ASSESSMENT

---

Intelligence-i1

## Why do We need It?

Scott McNealy CEO of Sun Microsystems said on 25 January 1999 “You have zero privacy anyway”. “Get over it.” What he really meant was, you have zero security.

Privacy and security is contextual, we apply it to specific facets of our lives or business operations, but not to everything otherwise we would be living on deserted islands and the world would have forgotten about us.

Dating back to 2004, there were a few data breaches with information being leaked onto the internet. This should have led to improved security and privacy measures. The reality is somewhat different, every year since then, there were more data breaches, but what is concerning is the increased size of the breaches with more and more data being leaked.

The leaks have not just effected companies with lax security, data from the military, governments, large corporations, even voter rolls have been leaked.

Providers of cell phones and other mobile devices, laptops and computers, WiFi linked devices such as cameras, printers, cannot be expected to ensure these devices will not be exploited and used by illegal hackers to launch attacks.

While the convenience of operating via the World Wide Web, we often forget the potential risk we are placing ourselves at and too often this realization is only a reality when we have been exposed to an attack.

Our job is to evaluate and address your points of vulnerability both physically and technology based, such as testing measures in place to assess their effectiveness, identify additional weaknesses that may have been overlooked, and compared to current threats through our intelligence.

We can also conduct online scanning of all phases of the web, surface, deep and dark web, and social media for data that may damage your brand, expose personal information, intellectual property and removing such information that may be a risk to your business associates or family at risk.

Our services are not only limited to businesses alone, but also individuals such as lawyers, celebrities, judges, law enforcement, Executives, people employed in sensitive positions who have a threat model which if ever compromised, could lead to considerable reputational damage, blackmail or even physical harm.

All information is systematically collected, correlated and recorded in our final report which will contain a summary of the relevant facts, with supporting analysis and validations to form comprehensive recommendations to allow you to address your risks or critical issues to take firm action.

### Our clients include:

• Technology Companies	• Oil and Petroleum	• The Big 4 Auditors
• Law Enforcement	• Legal Firms	• Logistic Companies
• Financial & Investment	• Recruitment Practitioners	• Research Institutes
• Mining Sector	• Manufacturing	• Security Companies

## We offer

### **Absolute confidentiality and discretion**

Our methods include leaving as small a foot print as possible while committing to the use of legal and non-intrusive techniques. All projects data are encrypted and not stored on any server that is accessible to outsiders via a network, preventing any opportunity of being hacked or stolen.

### **Personal service and quality**

Projects are customized to suit your needs that you deserve with unparalleled quality that comes with a small agency like ours with big resources.

### **Networks of information**

We only use our own appointed agent networks who make use of numerous sources of information both publically and covertly. These can range from in country court records to local media reports to human information sources.

### **Area of operation**

In excess of 8 years, we have established experienced networks across Africa and Asia, this has not prevented us from undertaking projects in other jurisdictions, as apart from our global contacts, one of our major skills is leveraging information from any new or difficult to operate in areas including war torn countries.

### **Cost and effective turn around**

We remain committed to transparency in terms of both costs and turnaround times. We will always provide the most accurate cost and time frame to complete a project while focusing on quality.

### **Other services:**

Due Diligence and Verification

Open Source Intelligence

Cyber Investigations

Training
